Product Parts

- 1 - Hub w/Legs
- 2 - Arms

Display Set-Up

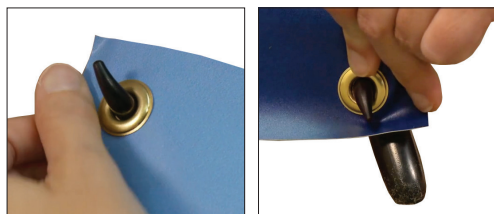

Step 1

Remove parts from bag and place on a clean work surface. Ratchet the Bottom Legs (1) forward to an extend position. Ratchet the rear leg forward, creating a tripod, set the unit on the floor.

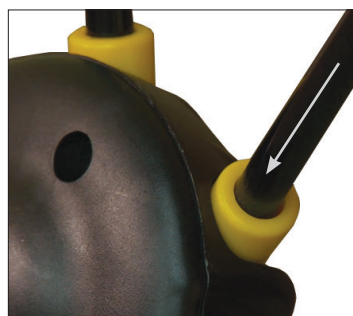

Step 3

Attach banner by inserting the hooks located on the Arms (2) into the top grommets of the banner. Gently pull the banner down to hook the lower banner grommets to the leg hooks.

Step 2

Insert the Arms (2) into the arm receptacles on the top of the Hub making sure the hooks are facing forward.

Note: Ensure the Arms are pressed firmly & all the way into the Hub. If the arms are loose both the Arms and the Hub can be damaged.

Step 4

You can adjust the tilt of the banner stand by adjusting the rear leg forward or backward.

Note:

The Orion Banner Display is designed to bend and when properly installed, the Banner will pull taut and the Arms will arch. However, if a banner smaller than the recommended size is installed, it may cause permanent failure of the display. See Graphic template on-line for recommended sizes.

Storage

Place all product parts into drawstring pouch and store in a cool dry location.

Care

To clean, wipe with damp cloth.
